Shoren,
I got the document with no problems. Would you send it to Michael Szerlog also? I'm about to board the last leg of my flights home. I don't think it will finish sending before I need to get on the plane.

Thanks for sending it.

Subject: Pebble ecological risk assesment

Palmer and Phil-

I have attached a very large file - if it doesn't come through I'll find another way to deliver it. This is hot off the press from the Nature Conservancy. It is an ecological risk assessment for the Pebble mine that uses the 2006 water rights application as a scenario to evaluate potential risk to Bristol Bay from large scale metal mining. I think you find that this is a great resource.

If you would like to schedule a call with the author or any of the technical review team to discuss the findings - I am happy to help facilitate that in coordination with TNC.

Very best -
